## TSC/Q0202: Ring Frame Doffer

### Brief Job Description

A ring frame tenter is responsible for carrying out tenting activities in a ring frame machine. A ring frame tenter should be able to creel the roving bobbin, piece the yarn and carry out routine cleaning and preventive maintenance activities to produce defect free yarn and ensure quality ring cops are produced in ring frame machine. This job requires the individual to have thorough knowledge of process flow and material flow in a spinning mill for yarn production and should know about the important functions and operations of a ring frame machine.

### Personal Attributes

A ring frame tenter should have good eyesight, hand-eye-leg coordination, motor skills and vision. He/she should also have good interpersonal skills.

### Applicable National Occupational Standards (NOS)

#### Compulsory NOS:

1. [TSC/N0205: Taking charge of shift and handling over shift to Ring Frame doffer](#)
2. [TSC/N0206: Preparing for Ring Frame doffing activity](#)
3. [TSC/N0207: Carry out Ring Frame doffing activity and post doffing activities](#)
4. [TSC/N0208: Responsibilities while working in auto doffer ring frame](#)
5. [TSC/N9001: Maintain work area, tools and machines](#)
6. [TSC/N9002: Working in a team](#)
7. [TSC/N9003: Maintain health, safety and security at workplace](#)
8. [TSC/N9004: Comply with industry and organizational requirement](#)

# TSC/N0205: Taking charge of shift and handling over shift to Ring Frame doffer

## Description

This unit is about taking charge of shift from previous shift Ring frame doffer and relieving the responsibilities to the next shift Ring frame doffer

## Scope

This unit/task covers the following:

- Taking charge of shift from Ring frame doffer
- Handing over shift to Ring frame doffer

## Elements and Performance Criteria

### *Taking charge of shift from Ring frame doffer*

To be competent, the user/individual on the job must be able to:

1. reach the work place at least 10 - 15 minutes early
2. bring the necessary operational tools to the department
3. understand the count produced, colour coding, followed in the ring frames
4. meet the previous shift doffer and discuss with him/ her regarding the schedule of doffing activities to be carried out in ring frame department, and issues faced with respect to the quality, production, spare, safety or any other specific instruction etc.
5. ensure the technical details are mentioned in the display board in the ring frame machine
6. check the availability of empty cops and fill the empty cop trolley and ensure colour coding and technical details mentioned
7. ensure proper functioning of cop trolleys
8. check the condition of empty cops in cop trolleys
9. ensure proper functioning of ring frame machine parts
10. check whether any spare/raw material/ tool / yarn / any other material are thrown under the machines or in the other work areas.
11. ask the previous shift doffer for any deviation in the above and bring the same to the knowledge of his/ her shift superior and the superior of the previous shift as well.
12. ensure the wastes collection boxes are empty while taking charge of shift
13. ensure that the workplace is clean
14. take over the shift from the outgoing shifts ring frame doffer in a proper manner

### *Handing over shift to Ring frame doffer*

To be competent, the user/individual on the job must be able to:

15. convey information effectively and confirm understanding. Provide the details regarding count produced, colour coding followed in the ring frames and prepare schedule for carrying out doffing activities
16. get clearance from the incoming counterpart before leaving the work spot

## Qualification Pack

17. report to his/ her shift superior and the incoming shift doffer in case his/ her counterpart does not report for the incoming shift
18. ensure the shift is properly handed over to the incoming shift doffer
19. report to his/ her shift superior about the quality / production / safety issues/ any other issue faced in his/ her shift and should leave the department only after getting concurrence for the same from his/ her superior
20. ensure that the work spot is clean
21. ensure proper cleaning after lot change and count change

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedures (SOP) and regulations in a spinning mill
- KU2.** safe working practices to be adopted in spinning mill
- KU3.** quality systems and other processes practiced in the spinning mill
- KU4.** reporting to the supervisor or higher authority in case of emergency
- KU5.** color coding adopted for different counts in the spinning mill
- KU6.** terminology used in the industry including technical and machine related
- KU7.** the importance of: types of fibres, types of yarn, yarn count, types of roving, roving hank, importance of roving quality, types of roving defects, reasons for ring breakage
- KU8.** process flow in a spinning mill
- KU9.** material flow in a spinning mill
- KU10.** importance of mixing & count change
- KU11.** functions of various parts of ring frame machine
- KU12.** importance of colour coding followed for different counts in spinning mill
- KU13.** knowledge of waste collection system & equipment used
- KU14.** importance of material handling and types of material handling equipments used
- KU15.** importance of cleanliness at workplace
- KU16.** functions and methodology for operating different material handling equipments
- KU17.** understand the functions of different signal lamps
- KU18.** guidelines for operating the ring frame machine
- KU19.** guidelines for taking charge of shift from previous Ring frame doffer
- KU20.** guidelines for handing over the shift to the next shift Ring frame doffer
- KU21.** safety procedures to be followed in a ring frame machine
- KU22.** traveller change

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and short sentences

## Qualification Pack

- GS2.** comprehend written instructions
- GS3.** communicate with supervisor appropriately
- GS4.** talk to others and convey information effectively
- GS5.** apply problem-solving approaches in different situations
- GS6.** refer defects to the supervisor
- GS7.** seek clarification on problems from others
- GS8.** apply good attention to detail
- GS9.** check that your work is complete and free of errors
- GS10.** procedure for operating different material handling tools and equipments
- GS11.** procedure to check the quality of ring cops, roving bobbins, proper functioning of machine parts in ring frame machine
- GS12.** procedure to maintain neatness at work

### TSC/N0206: Preparing for Ring Frame doffing activity

#### Description

This unit is about preparing for the doffing activity

#### Scope

This unit/task covers the following:

- identify the machine for carrying out doffing activity
- collecting the empty cops from storage area and loading in cop trolley
- support in preparing the creel zone in case of Lot change

#### Elements and Performance Criteria

##### *Identify the machine for carrying out doffing*

To be competent, the user/individual on the job must be able to:

1. follow the plan as instructed by superior for performing doffing activities at various machines in ring frame department
2. patrol and identify which machine in ring frame departments is ready for doffing
3. ensure minimum time is taken for identifying the machine on which doffing activity is to be carried out
4. ensure in confirming the machine with the superiors for carrying out doffing activity

##### *Collecting the empty cops from storage area and loading in cop trolley*

To be competent, the user/individual on the job must be able to:

5. identify the empty cops required for next doff and segregate it according to size and colour code
6. ensure the cops are clean
7. clean the empty cops and remove the yarn remnants, if needed
8. remove the collected waste and store it in a waste collection box
9. ensure that the empty cops are in good condition
10. remove the damaged cops and store in a separate place
11. ensure that an empty cop of correct size and colour code is loaded in the bobbin trolley
12. ensure proper material handling of empty cops
13. load the empty cops in the cop trolley in an organised manner
14. load the required number of empty cops as per requirement in different cop trolleys
15. move and arrange the cop trolleys in an organised manner near the ring frame machine in which doffing activity is to be carried out
16. ensure minimum time is taken for carrying the above activities
17. ensure that overhead blower is parked at one side of the machine during doffing
18. overhead blower should start as soon as the doffed machine starts

##### *Support in preparing the creel zone in case of Lot change*

## Qualification Pack

To be competent, the user/individual on the job must be able to:

19. support the tenter in bringing new bobbins from the speed frame department to the ring frame filling zone at the time of lot change as per instruction from the superiors
20. to ensure correct roving bobbins are taken for filling
21. creel the roving bobbins in the reserve umbrella creel as instructed by superiors
22. ensure proper material handling of bobbin and bobbin trolley
23. keep the roving waste in the waste collection pocket provided to each operator and then put in the waste collection box
24. ensure minimum time is taken for filling the roving bobbin
25. discuss with the supervisor on a timely basis for clarifications if any
26. ensure cleanliness at work place

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedures (SOP) and regulations in a spinning mill
- KU2.** safe working practices to be adopted in spinning mill
- KU3.** quality systems and other processes practiced in the spinning mill
- KU4.** reporting to the supervisor or higher authority in case of emergency
- KU5.** color coding adopted for different counts in the spinning mill
- KU6.** Understand the terminology associated with the job role
- KU7.** understand the importance of types of fibers, types of yarn, yarn count, types of roving, roving hank, importance of roving quality, types of roving defects, reasons for roving breakage
- KU8.** process flow in a spinning mill
- KU9.** material flow in a spinning mill
- KU10.** functions of the different parts of machine
- KU11.** importance of filling
- KU12.** importance of colour coding followed for different counts in a spinning mill
- KU13.** functions of various tools and equipments used
- KU14.** knowledge of waste collection system and equipments used
- KU15.** importance of material handling and types of material handling equipments used
- KU16.** functions and methodology for operating different material handling equipments
- KU17.** understand the functions of different signal lamps
- KU18.** guidelines for operating the machine
- KU19.** safety procedures to be followed in a machine

## Generic Skills (GS)

User/individual on the job needs to know how to:

## Qualification Pack

- GS1.** write clear and short sentences
- GS2.** comprehend written instructions
- GS3.** communicate with supervisor appropriately
- GS4.** talk to others and convey information effectively
- GS5.** apply problem-solving approaches in different situations
- GS6.** refer anomalies to the supervisor
- GS7.** seek clarification on problems from others
- GS8.** apply good attention to detail
- GS9.** check that work is complete and free from errors
- GS10.** procedure to transport the cop trolley and bobbin trolley
- GS11.** standard operating procedures to be followed for filling the roving bobbin
- GS12.** procedure for operating different material handling tools and equipments
- GS13.** procedure for removing the yarn remnants in cops
- GS14.** procedure for segregating the damaged cops
- GS15.** procedure for filling the empty cops in cop trolley
- GS16.** procedure for handling of empty cops and cop trolley
- GS17.** procedure for handling of roving bobbin and bobbin trolley
- GS18.** procedure for filling the roving bobbin
- GS19.** maintain neatness at work place

# TSC/N0207: Carry out Ring Frame doffing activity and post doffing activities

## Description

This unit is about carrying out the doffing activities in a Ring frame machine

## Scope

This unit/task covers the following:

- transporting the empty cops to ring frame machine
- carryout doffing activity
- check for completion of doffing activity
- post doffing responsibilities
- transporting and storing the filled cops
- other responsibilities

## Elements and Performance Criteria

### *Transporting the empty bobbin trolley to the ring frame machine*

To be competent, the user/individual on the job must be able to:

1. transport the empty cop trolley to ring frame machine
2. arrange the cops trolley in an organised manner
3. stop the machine

### *Carry out doffing*

To be competent, the user/individual on the job must be able to:

4. ensure the machine is completely stopped
5. Ensure that lappet rail are lifted automatically, otherwise do it manually
6. remove the full yarn cop from spindle and replace it with an empty cop from the cop trolley
7. ensure proper procedure is followed for carrying out doffing activity
8. ensure the empty cop is properly mounted in the spindle
9. repeat the doffing activity for specified number of spindles as instructed by your superior
10. ensure proper material handling of empty cops and full cops
11. Ensure that minimum time is taken for carrying out doffing activity
12. cover the doffed ring cops if needed
13. ensure cleanliness at work place

### *Check for completion of doffing activity*

To be competent, the user/individual on the job must be able to:

14. ensure that all the full cops are replaced with empty cops
15. ensure that gaiting is done for all the spindles in a proper manner
16. ensure that all full cops are placed in the cop trolley

### *Post doffing responsibilities*

## Qualification Pack

To be competent, the user/individual on the job must be able to:

17. ensure the doffing is completed out in a proper manner
18. support the tenter by bringing roving bobbin for filling, piecing and filling activities in the event of a count change
19. support the tenter in changing traveller as instructed by superiors during count change
20. ensuring the machine is ready to start
21. start the machine
22. Ensure that the lappet rail are lowered to its position properly
23. do gaiting with the same running yarn
24. ensure proper functioning of machine
25. report to the supervisor / maintenance team if the machine is not functioning properly
26. ensure to restart the overhead blower along with the machine

### *Transporting & storing the filled cops*

To be competent, the user/individual on the job must be able to:

27. ensure proper transportation of filled cop trolleys

### *Other responsibilities*

To be competent, the user/individual on the job must be able to:

28. ensure that the empty cop is kept clean and arranged in a proper manner
29. clean the defective cops in the respective shift and ensure that yarn remnants are removed
30. segregate the roving waste and yarn waste count wise and store in their respective waste bins
31. weigh the different types of waste collected and maintain record in a register, if needed
32. support the tenter in carrying out tenting activities as and whenever instructed by the supervisor
33. support the maintenance team while machine is under maintenance
34. Carry out activities assigned by the supervisor from time to time
35. take part in doffs wherever necessary as instructed by the supervisor
36. transport the empty bobbins to the speed frame department storage area after count change
37. ensure cleanliness at work place

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedures (SOP) and regulations in a spinning mill
- KU2.** safe working practices to be adopted in spinning mill
- KU3.** quality systems and other processes practiced in the spinning mill
- KU4.** reporting to the supervisor or higher authority in case of emergency
- KU5.** color coding adopted for different counts in the spinning mill
- KU6.** importance of different types of fibres, roving, roving, yarn, hank and count.
- KU7.** types of roving defects and reason for roving breakage
- KU8.** process flow and material flow in a spinning mill

## Qualification Pack

- KU9.** functions of different parts of a ring frame machine
- KU10.** functions of different signal lamps and control buttons
- KU11.** guidelines for operating the ring frame machine
- KU12.** importance of colour coding
- KU13.** importance of doffing
- KU14.** guidelines for carrying out doffing activity
- KU15.** importance of count change and traveler change
- KU16.** importance of cleaning
- KU17.** types of waste
- KU18.** tools and equipments used for cleaning
- KU19.** guidelines for carrying out cleaning activity
- KU20.** guidelines for cleaning various part of ring frame machine
- KU21.** importance of machine maintenance
- KU22.** guidelines for carrying out maintenance activities
- KU23.** knowledge of tenting activities to be followed in a ring frame machine
- KU24.** operational schedule for cleaning different parts of ring frame machine
- KU25.** importance of material handling
- KU26.** guidelines for operating various material handling tools
- KU27.** importance of safety at work place
- KU28.** safety procedures to be followed in a Ring frame machine

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and short sentences
- GS2.** read in local language and comprehend them
- GS3.** communicate with supervisor appropriately
- GS4.** talk to others and convey information effectively
- GS5.** procedure to arrange empty cops in cop trolley
- GS6.** procedure to carryout doffing activities
- GS7.** procedure to remove full ring cops and replace with empty cops
- GS8.** procedure for mounting the cop in the spindle
- GS9.** standard filling procedure
- GS10.** standard piecing/gaiting procedure
- GS11.** standard doffing procedure
- GS12.** procedure for cleaning different parts of machine
- GS13.** procedure for cleaning the doffing zone
- GS14.** procedure for depositing the waste in waste collection box
- GS15.** procedure for changing traveler
- GS16.** procedure for handling different material handling tools

## Qualification Pack

**GS17.** procedure for material handling of cops and cop trolley

**GS18.** maintain neatness at work place

## Qualification Pack

### TSC/N0208: Responsibilities while working in auto doffer ring frame

#### Description

This unit is about carrying out the tenting responsibilities in a Ring frame machine with auto doffer

#### Scope

This unit/task covers the following:

- Responsibilities while working in auto doffer ring frame
- other doffing responsibilities

#### Elements and Performance Criteria

##### *Responsibilities while working in auto doffer ring frame*

To be competent, the user/individual on the job must be able to:

1. ensure there is no empties or full cop under the doffing unit
2. ensure empty ring tubes are ready in all c channel peg tray before the machine reaches the doff length
3. ensure there is no empties or full cops found under the doffing unit to avoid any stuck up
4. ensure empty ring tubes are loaded fully in the tube loader reserve box before doffing is started.
5. ensure doffing person reaches the machine for gaiting work before starting the doffing activity
6. ensure doff trolleys are kept in the off end in a specified position.
7. ensure that doffing process is functioning properly without any malfunction.
8. ensure that after doffing gaiting to be done properly and timely
9. ensure that all the full cops are removed from the spindles and empties are loaded in spindles during doffing to avoid yarn wound on empty spindle.
10. ensure that all the grippers in the doffing unit are available in position without missing during doffing.
11. ensure that there is no air leakage in the grippers.
12. ensure the wastes collected from different parts of machine are deposited in the respective dustbins
13. ensure the ring frame department is neat and clean

##### *Other Doffing responsibilities*

To be competent, the user/individual on the job must be able to:

14. verify the proper build of the ring cop
15. record the production details in the production report
16. report to the supervisor in case of emergency stoppage of machine
17. support the tenter and maintenance team for carrying out cleaning activities, on need basis
18. support the maintenance team while machine is under maintenance
19. ensure all details related to production are provided to the next shift doffer while relieving

## Qualification Pack

### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedures (SOP) and regulations in a spinning mill
- KU2.** safe working practices to be adopted in spinning mill
- KU3.** quality systems and other processes practiced in the spinning mill
- KU4.** reporting to the supervisor or higher authority in case of emergency
- KU5.** Process flow and material flow in a spinning mill
- KU6.** functions of different parts of a ring frame machine
- KU7.** importance and functions of auto doffing
- KU8.** functions of different mechanisms of auto doffing unit
- KU9.** advantages and disadvantages of auto doffing
- KU10.** importance of tube loader, pin spacer, gripper
- KU11.** importance of material handling
- KU12.** knowledge of gaiting
- KU13.** importance of cop build
- KU14.** knowledge of manual doffing of ring cops
- KU15.** importance of cleanliness at work place
- KU16.** guidelines for identifying worn out parts
- KU17.** guidelines for carrying out cleaning and maintenance activities
- KU18.** importance of waste collection
- KU19.** guidelines for collecting wastes
- KU20.** understand the safety precautions to be followed in a ring frame machine
- KU21.** cleaning of trolley wheels from waste
- KU22.** contamination free trolleys
- KU23.** placing bobbins in a systematic manner in box (tip one side)
- KU24.** no variation in length of bobbins
- KU25.** no broken bobbin to be used

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and short sentences
- GS2.** comprehend written instructions
- GS3.** communicate with supervisor appropriately
- GS4.** talk to others and convey information effectively
- GS5.** doffing procedure as applicable to work requirements
- GS6.** procedure for handling of cops, wastes & doff trolleys
- GS7.** gaiting procedure

**GS8.** maintain neatness at work place

### TSC/N9001: Maintain work area, tools and machines

#### Description

This unit provides performance criteria, knowledge & understanding and skills & abilities required to organise/ maintain work areas and activities to ensure tools and machines are maintained as per norms

#### Scope

This unit/task covers the following:

- Maintaining the work area, tools and machines

#### Elements and Performance Criteria

##### *Maintaining the work area, tools and machines*

To be competent, the user/individual on the job must be able to:

1. handle materials, machinery, equipment and tools with care and use them in the correct way
2. use correct lifting and handling procedures
3. use materials to minimize waste
4. maintain a clean and hazard free working area
5. maintain tools and equipment
6. carry out running maintenance within agreed schedules
7. carry out maintenance and/or cleaning within ones responsibility
8. report unsafe equipment and other dangerous occurrences
9. ensure that the correct machine guards are in place
10. work in a comfortable position with the correct posture
11. use cleaning equipment and methods appropriate for the work to be carried out
12. dispose of waste safely in the designated location
13. store cleaning equipment safely after use
14. carry out cleaning according to schedules and limits of responsibility

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personal hygiene and duty of care
- KU2.** safe working practices and organisational standard operating procedures
- KU3.** limits of your own responsibility
- KU4.** ways of resolving problems within the work area
- KU5.** the production process and the specific work activities that relate to the whole process
- KU6.** the importance of effective communication with supervisors
- KU7.** the lines of communication, authority and reporting procedures

## Qualification Pack

- KU8.** the organisation's rules, codes and guidelines (including timekeeping)
- KU9.** the company's quality standards
- KU10.** the importance of complying with written instructions
- KU11.** equipment operating procedures / supervisor's instructions
- KU12.** work instructions and specifications and interpret them accurately
- KU13.** relation between work role and the overall manufacturing process
- KU14.** hazards likely to be encountered when conducting routine maintenance
- KU15.** the importance of taking action when problems are identified
- KU16.** different ways of minimising waste
- KU17.** the importance of running maintenance and regular cleaning
- KU18.** effects of contamination on products i.e. machine oil, dirt, foreign materials
- KU19.** common faults with equipment and the method to rectify
- KU20.** maintenance procedures
- KU21.** different types of cleaning equipment and substances and their use
- KU22.** safe working practices for cleaning and the method of carrying them out

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** comprehend written instructions
- GS2.** read any application sent by other colleagues
- GS3.** Communicate effectively in local language
- GS4.** communicate with supervisor appropriately
- GS5.** talk to others to convey information effectively
- GS6.** identify the real reason of problem faced
- GS7.** apply problem-solving approaches in different situations
- GS8.** refer anomalies to the supervisor
- GS9.** seek clarification on problems from others
- GS10.** apply good attention to detail
- GS11.** check your work is complete and free from errors
- GS12.** make sure every kind of communication is error free
- GS13.** communicate effectively
- GS14.** apply leadership skills wherever required
- GS15.** take initiative at the right place
- GS16.** understand the requirement to be creative

### TSC/N9002: Working in a team

#### Description

This unit is about working as a team member in the textile industry

#### Scope

This unit/task covers the following:

- commitment and trust
- communication
- adaptability
- creative freedom

#### Elements and Performance Criteria

##### *Commitment and trust*

To be competent, the user/individual on the job must be able to:

1. be accountable to the own role in whole process
2. perform all roles with full responsibility
3. be effective and efficient at workplace

##### *Communication*

To be competent, the user/individual on the job must be able to:

4. properly communicate about company policies
5. report all problems faced during the process
6. talk politely with other team members and colleagues
7. submit daily report of own performance

##### *Adaptability*

To be competent, the user/individual on the job must be able to:

8. adjust in different work situations
9. give due importance to other's point of view
10. avoid conflicting situations

##### *Creative freedom*

To be competent, the user/individual on the job must be able to:

11. develop new ideas for work procedures
12. improve upon the existing techniques to increase process efficiency

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedures (SOP) and regulations in a textile mill  
**KU2.** procedure followed to get the final output in the mill

## Qualification Pack

- KU3.** safe working practices to be adopted in textile mill
- KU4.** reporting to the supervisor or higher authority about any grievances faced
- KU5.** the importance of the previous and next step of the process
- KU6.** process flow in a textile mill and the concerned workers
- KU7.** material flow in a textile mill and the required person
- KU8.** functions of different parts of the machine
- KU9.** tools and equipments used
- KU10.** guidelines for operating the machine
- KU11.** safety procedures to be followed in the machine

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and short sentences
- GS2.** write daily work report
- GS3.** write grievance complaint application
- GS4.** comprehend written instructions
- GS5.** read any application sent by other colleagues
- GS6.** communicate with supervisor appropriately
- GS7.** talk to co-workers to convey information effectively
- GS8.** identify the real reason of problem faced
- GS9.** be able to find the most effective solution to the problems faced
- GS10.** apply good attention to detail
- GS11.** ensure every kind of communication is error free
- GS12.** communicate effectively
- GS13.** apply leadership skills wherever required
- GS14.** take initiative at the right place
- GS15.** understand the requirement to be creative

### TSC/N9003: Maintain health, safety and security at workplace

#### Description

This unit provides performance criteria, knowledge & understanding and skills & abilities required to comply with health, safety and security requirements at the workplace and covers procedures to prevent, control and minimize risk to self and others.

#### Scope

This unit/task covers the following:

- comply with health, safety and security requirements at work
- Recognizing the hazards
- Planning the safety techniques
- Implementing the programs

#### Elements and Performance Criteria

##### *Comply with health, Safety and security requirements at work*

To be competent, the user/individual on the job must be able to:

1. comply with health and safety related instructions applicable to the workplace
2. use and maintain personal protective equipment such as ear plug, nose mask, head cap etc., as per protocol
3. carry out own activities in line with approved guidelines and procedures
4. maintain a healthy lifestyle and guard against dependency on intoxicants
5. follow environment management system related procedures
6. identify and correct (if possible) malfunctions in machinery and equipment
7. report any service malfunctions that cannot be rectified
8. store materials and equipment in line with organisational requirements
9. safely handle and remove waste
10. minimize health and safety risks to self and others due to own actions
11. seek clarifications, from supervisors or other authorized personnel in case of perceived risks
12. monitor the workplace and work processes for potential risks and threat
13. carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
14. report hazards and potential risks/ threats to supervisors or other authorized personnel
15. participate in mock drills/ evacuation procedures organized at the workplace
16. undertake first aid, fire-fighting and emergency response training, if asked to do so
17. take action based on instructions in the event of fire, emergencies or accidents
18. follow organisation procedures for shutdown and evacuation when required

##### *Recognizing the hazards*

To be competent, the user/individual on the job must be able to:

## Qualification Pack

19. identify different kinds of possible hazards (environmental, personal, ergonomic, chemical) of the industry
20. recognise other possible security issues existing in the workplace

### *Planning the safety techniques Implementing the programs*

To be competent, the user/individual on the job must be able to:

21. recognise different measures to curb the hazards
22. communicate the safety plan to everyone
23. attach disciplinary rules with the implementation

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedures (SOP) and regulations in a textile mill
- KU2.** safe working practices to be adopted in textile mill
- KU3.** quality systems and other processes practiced in the textile mill
- KU4.** health and safety related practices applicable at the workplace
- KU5.** potential hazards, risks and threats based on nature of operations
- KU6.** organizational procedures for safe handling of equipment and machine operations
- KU7.** potential risks due to own actions and methods to minimize these
- KU8.** environmental management system related procedures at the workplace
- KU9.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU10.** potential accidents and emergencies and response to these scenarios
- KU11.** reporting protocol and documentation required
- KU12.** details of personnel trained in first aid, fire-fighting and emergency response
- KU13.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire
- KU14.** occupational health and safety risks and methods
- KU15.** personal protective equipment and method of use
- KU16.** identification, handling and storage of hazardous substances
- KU17.** proper disposal system for waste and by-products
- KU18.** signage related to health and safety and their meaning
- KU19.** importance of sound health, hygiene and good habits
- KU20.** ill-effects of alcohol, tobacco and drugs

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and short sentences
- GS2.** read and understand the company instructions

## Qualification Pack

- GS3.** read and understand work instructions
- GS4.** read and understand the safety guidelines
- GS5.** listen to others attentively
- GS6.** respond to emergencies, accidents or fire at the workplace
- GS7.** evacuate the premises and help others in need while doing so
- GS8.** the value of physical fitness, personal hygiene and good habits
- GS9.** talk with others politely
- GS10.** identify correct safety measure for particular hazard
- GS11.** make required safety plans as and when required
- GS12.** raise alarm in case of emergency
- GS13.** know the use of correct safety measure whenever required
- GS14.** be attentive to details
- GS15.** be careful to avoid occurrence of hazards
- GS16.** maintenance of neatness at work
- GS17.** procedure for reporting unwanted behavior

### TSC/N9004: Comply with industry and organizational requirement

#### Description

This unit is about knowing, understanding, and complying with the requirements of the organization and the textile industry

#### Scope

This unit/task covers the following:

- self development
- team work
- organizational standards
- industry standards

#### Elements and Performance Criteria

##### *Self development*

To be competent, the user/individual on the job must be able to:

1. perform own duties effectively
2. take responsibility for own actions
3. be accountable towards the job role and assigned duties
4. take initiative and innovate the existing methods
5. focus on self-learning and improvement

##### *Team work*

To be competent, the user/individual on the job must be able to:

6. co-ordinate with all the team members and colleagues
7. communicate politely
8. avoid conflicts and miscommunication

##### *Organisational standards*

To be competent, the user/individual on the job must be able to:

9. know the organisational standards
10. implement them in your performance
11. motivate others to follow them

##### *Industry standards*

To be competent, the user/individual on the job must be able to:

12. monitor the workplace and work processes for potential risks and threat
13. align them with organisation standards

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

## Qualification Pack

- KU1.** standard operating procedures (SOP) and regulations in a textile mill
- KU2.** reporting to the supervisor or higher authority
- KU3.** knowledge of organisational standards
- KU4.** knowledge of industry standards
- KU5.** process and material flow in a textile mill
- KU6.** importance of complying with the standards
- KU7.** guidelines for cleaning the various parts of machine

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write clear and short sentences
- GS2.** read the given instructions
- GS3.** comprehend written instructions
- GS4.** talk effectively with others
- GS5.** put forward your point
- GS6.** listen to others
- GS7.** Organizational requirements
- GS8.** your responsibilities at the workplace
- GS9.** procedure to comply with the industry standards

## Qualification Pack

<b>NSQC Clearance Date</b>	05/08/2015

## Qualification Pack

### Assessment Guidelines and Assessment Weightage

#### Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

#### Minimum Aggregate Passing % at QP Level : 50

**(Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

#### Assessment Weightage

##### Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage

### Glossary

<b>Sector</b>	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
<b>Sub-sector</b>	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
<b>Occupation</b>	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
<b>Job role</b>	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
<b>Occupational Standards (OS)</b>	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
<b>Performance Criteria (PC)</b>	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
<b>National Occupational Standards (NOS)</b>	NOS are occupational standards which apply uniquely in the Indian context.
<b>Qualifications Pack (QP)</b>	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
<b>Unit Code</b>	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
<b>Unit Title</b>	Unit title gives a clear overall statement about what the incumbent should be able to do.
<b>Description</b>	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
<b>Scope</b>	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

## Qualification Pack

<b>Knowledge and Understanding (KU)</b>	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
<b>Organisational Context</b>	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
<b>Technical Knowledge</b>	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
<b>Core Skills/ Generic Skills (GS)</b>	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
<b>Electives</b>	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
<b>Options</b>	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
